Víte, že

nábytek značky ERRA je vyráběn z materiálů vhodných do prostor se zvýšenou vlhkostí?

- speciální lamino se zvýšenou odolností proti vlhkosti
- MDF desky lakované dvousložkovými barvami
- desky Rockstone 100% odolné proti vlhkosti
- skleněné desky
- nerezová ocel

V každém případě však koupelna musí být vždy řádně odvětrávána a vytápěna.

Víte, že

již při přípravě rozvodů vody a elektřiny byste měli mít vybraný koupelnový nábytek?

- závěsné typy se připevňují pomocí kotvicích šroubů do stěny, pokud se jedná o stěnu ze sádkokartonu, musí se předem připravit zesílení konstrukce stěny
- některé designové řady umyvadlových skříněk jsou nižší a výška umístění přívodu vody a odpadu není standardní
- při rozhodování o osazení zásuvek a vypínačů již musíte mít jasno o typu a umístění zrcadla a doplňkových skříněk
- umístění vývodů pro osvětlení nad zrcadlem jsou přímo závislé na typu světla i zrcadla

Víte, že

nábytek značky ERRA je vybaven pojezdy zásuvek s pomalým dojezdem a systémem automatického dovření zásuvek?

- tyto systémy zajistí komfortní, tiché a pohodlné používání nábytku

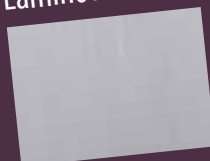

Víte, že

LED osvětlení galerek a zrcadel je 10x úspornější než klasická wolframová žárovka osvětlení a má až 100x delší životnost?
